Newline Spring Launch 2025

At Newline™ by Fifth Third, we're dedicated to providing our clients with the tools they need to operate more efficiently and scale at their own pace. That's exactly the focus of Newline's 2025 Spring Launch which is composed of a suite of enhancements designed to give you greater self-service control over your programs. We've designed these new capabilities to empower you to make key decisions independently, giving you time back to focus on what matters most—building your product.

Returns and Reversals Endpoint

Handling payment corrections just got easier. With the new/returns endpoint you can execute both returns and reversals directly through the Newline API.

This new functionality enables Newline clients to reverse ACH transfers that are authorized but are canceled before funds settle—ensuring funds never leave the originating account. Conversely, clients can use issue a return for ACH or wire transfers that have already settled and need to be refunded.

Available to Newline clients using the Newline payment API.

Authorize VRN Transfers

Gain real-time decision-making power over transactions. The Newline authorize endpoint enables clients to programmatically approve or deny payments received to a [Virtual Reference Number \(VRN\)](#) before they settle in an account. This added layer of control enables you to create a customized transaction approval process that aligns with your business needs.

The authorize endpoint is available to Newline clients using Virtual Reference Numbers (VRNs).

Newline Dashboard

Introducing the Newline Dashboard. We built the Newline Dashboard to give non-technical team members including CFOs and finance teams a way to monitor their programs without relying solely on API calls. The Newline Dashboard is an intuitive user interface clients can use to view transaction data, track balances, and generate reports. For clients in production, the Newline Dashboard also provides easy access to the Newline Service Desk to submit support requests.

The Newline Dashboard is currently in closed Beta. If you would like to help shape the functionality of the Newline Dashboard, reach out to your relationship manager to join the Beta cohort.
